

Dear Hiring Manager,

I am thrilled to apply for the Director of Data Engineering position at Human Agency, where I can leverage my technical expertise and leadership skills to drive innovative data engineering solutions. With my background in improving ELT/ETL pipelines with SQL, dbt, Airflow, Tableau, and experience in leading high-performing teams, I am confident that I would be a great fit for this role.

As I researched Human Agency, I was impressed by the company's commitment to using data-driven insights to drive social impact. The mission to "unlock human potential" resonates deeply with me, as I believe that technology should serve humanity. If anything you might be interested in my [Information Asymmetry](#) Series in LinkedIn,

As a seasoned data leader, I bring a unique blend of technical skills that enables me to design and implement **scalable data pipelines** that deliver actionable insights. Moreover, my experience in leading teams and engaging stakeholders has equipped me with strong communication and collaboration skills, which are essential for driving successful projects forward.

In this role, I would focus on developing and executing strategies that leverage Human Agency's technical capabilities to drive business outcomes. My leadership style is centered around empowering teams to take ownership of their work and fostering a culture of continuous learning and improvement.

Thank you for considering my application. I look forward to discussing how my skills align with your needs.

I reviewed our compatibility based on job posting, research and my experience with my proprietary ML Model and these are my findings:

Match Score: 87% - Features Compared: 54 - Methodology: Weighted scoring: Technical Skills (40%), Technologies/Tools (30%), Experience Level (15%), Soft Skills (10%), Other Factors (5%).

Sincerely,
